

Is Your Business Due for a Tech Health Check?

Don't guess where your IT stands. Answer a few questions and discover how healthy your business technology really is.

Yes No

☐ ☐

Has it been more than 12 months since your last tech health check?

☐ ☐

Are your systems or software more than three years old?

☐ ☐

Have you experienced downtime, data loss or system crashes in the past six months?

☐ ☐

Are your backups outdated and untested?

☐ ☐

Do you lack a clear IT roadmap aligned with your business goals?

☐ ☐

Are you uncertain whether your business meets industry compliance standards?

☐ ☐

Do employees frequently complain about slow systems or connectivity issues?

☐ ☐

Have you added new tools, users or locations without reviewing your IT setup?

☐ ☐

Are you unsure who has access to your systems and data?

☐ ☐

Do you rely on a "break-fix" approach instead of proactive IT management?

Scoring Guide

Score 1 point for each yes response.

8-10 points:
Your IT environment is overdue for a health check.

5-7 points:
An ounce of prevention is worth a pound of cure. Ignore your tech health at your peril.

0-4 points:
You're in good shape, but regular checkups are still essential.

The best time for a tech health checkup was yesterday. The next best time is now.
